

**PLAINFIELD PUBLIC SCHOOLS
EDUCATIONAL GOAL STATEMENT**

The Plainfield Public School district is committed to the belief that each child shall have equal access to a viable educational program. Our schools will provide the opportunity for each student regardless of advantage or ability to acquire the knowledge, skills, and attitudes necessary to lead successful, productive lives. In order to accomplish these goals, the school and community must work together to provide quality education.

Our community will share this responsibility through its varied resources. Such resources include but are not limited to adequate financial support and sound fiscal management practices, as well as cooperative advisory relationships between members of the school and community. The Plainfield Public School district recognizes the importance of the family's role and responsibility in the education of its children.

The Plainfield Board of Education shall, at a minimum, set goals and review goal achievement for the school district on an annual basis.
